Non-GAAP Financial Measures

This Presentation includes certain financial measures not presented in accordance with GAAP including, but not limited to, Adjusted EBITDA and certain ratios and other metrics derived therefrom, including free cash flow and ex-TAC Gross Profit, and related margin measures, as well as New Publisher ex-TAC Gross Profit. These non-GAAP financial measures are not measures of financial performance in accordance with GAAP, and may exclude items that are significant in understanding and assessing the Company's financial results. Therefore, these measures should not be considered in isolation or as an alternative to net income, cash flows from operations or other measures of profitability, liquidity or performance under GAAP. You should be aware that the Company's presentation of these measures may not be comparable to similarly-titled measures used by other companies.

The Company believes these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to the Company's financial condition and results of operations. The Company believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends and In comparing the Company's financial measures with other similar companies, many of which present similar non-GAAP financial measures to investors. These non-GAAP financial measures are subject to inherent limitations as they reflect the exercise of judgments by management about which expense and income are excluded or included in determining these non-GAAP financial measures. Please refer to footnotes where presented on each page of this Presentation or to the appendix found at the end of this presentation for reconciliations of these measures to what the Company believes are the most directly comparable measures evaluated in accordance with GAAP.

This Presentation also includes certain projections of non-GAAP financial measures. Due to the high variability and difficulty in making accurate forecasts and projections of some of the information excluded from these projected measures, together with some of the excluded information not being ascertainable or accessible, the Company is unable to quantify certain amounts that would be required to be included in the most directly comparable GAAP financial measures without unreasonable effort. Consequently, no disclosure of estimated comparable GAAP measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included.

Note: Although we provide guidance for Adjusted EBITDA, we are not able to provide guidance for projected Net income (loss), the most directly comparable GAAP measures. Certain elements of Net income (loss), including share-based compensation expenses, are not predictable due to the high variability and difficulty of making accurate forecasts. As a result, it is impractical for us to provide guidance on Net Income (loss) or to reconcile our Adjusted EBITDA guidance without unreasonable efforts. Consequently, no disclosure of projected Net income (loss) is included. For the same reasons, we are unable to address the probable significance of the unavailable information.
